

a few notes about the spa

We use natural, organic spa and beauty products from renowned holistic health innovator Naturopathica, an authority in alternative healing and natural therapies.

The Spa was constructed with a predominance of natural and noble materials including wood, stone and marble.

Music in The Spa was carefully selected to soothe the senses. Each room has a unique music experience.

All of our treatments are inspired by American Indian beliefs and legends. These treatments, based on the concept of the American Indian medicine wheel, are intended to work in line with energies of nature, turning as do the seasons, in an ongoing cycle.

Turquoise is a spiritual and aesthetic touch point of The Spa. This most sacred of stones, the American Indians believe, is a piece of sky fallen on earth and regenerates the skin while harmonizing the mind and body. The “stone of eternal youth” finds a place in both the soothing décor and several of our treatments.

Chromotherapy lighting, which balances physical, emotional and spiritual energy, is located throughout The Spa.

The Unity Suite (with Jacuzzi and Chromotherapy) offers a completely relaxing sanctuary for couples, friends or mothers and daughters.

The Spa has a complete salon offering manicures, pedicures and hair styling.

Our Spa Shop offers a tempting array of Naturopathica treatment products, Dayna Decker scents for the home and many other uplifting, inspired items for your well-being and pleasure.

We offer make up application and consultation services and are able to create a beautiful look for your special occasion. Our make up artists use Jane Iredale’s award winning mineral makeup, which is formulated with pure micronized minerals and pigments. These all-natural cosmetics contain no oil to clog or enlarge pores, no talc to dry or clog the skin and are free of perfume, alcohol, chemical additives and artificial dyes.

The ladies locker room includes a “Spa Horizon” hydrospace, unique in the United States, and a hammam (Turkish steam room). The gentlemen’s locker room includes a sauna and hammam.

The chlorine-free swimming pool opens to a large terrace, allowing guests to feel the warmth of the sun or the fire pit while outdoors.

Before or after your Spa experience, the Relaxation Room provides guests with comfortable chaise lounges, personal iPods and pleasing views.

Our fully equipped Fitness Room enables guests to exercise while enjoying views of the golf course and the nature beyond.
